

Personalized Doorways

The Climate Web covers hundreds of climate-relevant topics. It employs thousands of topical headings, index entries, tagged information collections, and more to that end. Not including the tens of thousands of documents, news stories, websites, and more.

In total Personalized Doorways can in principle link to more than 100,000 landing points in the Climate Web.

In the next few pages you can scan through a subset of potential landing points. This list is far from comprehensive, but covers a lot of ground. Feel free to ask about other topics; they're almost certainly already covered in the Climate Web.

Several categories of landing points are included in the list below:

- **Deep Dives (large topical collections)**
- **Index Entries (broad to granular)**
- **Tagged Collections (not otherwise visible)**
- **Sources Headings (books, reports, articles)**
- **News Headings (news stories, blogs)**
- **Network Headings (websites, web pages)**
- **Knowledgebase Headings (related information from multiple sources)**
- **Individual Thoughts**
